Maximize Your Microsoft Excel® Investment And Extend Its Capabilities

The GeoGraphix® Engineering Dashboard is an Excel add-in to GeoGraphix® Discovery® Basemap package that lets you:

Features

The GeoGraphix® Engineering Dashboard is an Excel add-in to GeoGraphix® Discovery® Basemap package that lets you:

- Link to almost any source of well or production data using Microsoft Excel® including Aries™, DSS, spreadsheets and even proprietary relational databases.
- Now available for Office 2010 64-bit
- Create bubble and pie layers from your well and production data, and display them on your Discovery™ maps.
- Generate new zones and zone attributes in Microsoft® Excel® and import them directly into ZoneManager.
- Looks and feels like Excel®!!
